

FY250/1 FY300/1 刀架安装式磨头
FY250/1 FY300/1 TURRET-MOUNTED GRINDER
ATTACHMENT

特点

- 安装方便。可直接安装在车床刀架上。
- 主机设计合理，重量轻、低噪音、低温升、低振动、高精度。
- 可磨削传统磨床上无法加工的工件。
- 可磨削车床本体上的锥孔，顶尖，卡爪加持位等。
- 可在车床上磨削外圆、内圆、端面、外锥面及内锥孔，如莫氏锥孔、公制锥孔、7:24锥孔。
- 磨头砂轮可换成切割片成为切割机，换成抛光轮成为抛光机。

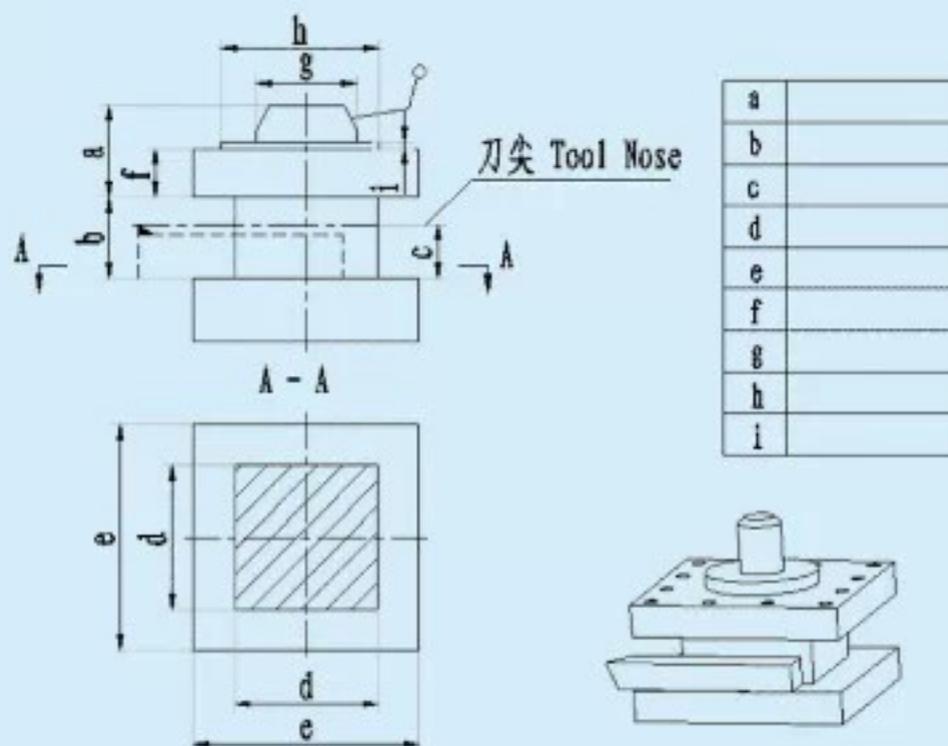

Features

- Easy to install. It can be mounted directly on the lathe turret.
- Reasonable design, light weight, low noise, low temperature rise, low vibration, high precision.
- Workpiece that can not be processed on conventional grinder can be grinded.
- Tapered bore, center, claw on lathe itself can be grinded.
- It can grind cylindrical, inner circle, face, outer cone and inner tapered bore, such as the Morse taper, metric tapered bore, 7:24 taper.
- Abrasive wheel can be replaced for cutting disc, polishing wheel, It is used for cutting and polishing.

磨削类型

Grinding Type

主要参数

Main Parameter

参数PARAMETER	型号TYPE	FY250/1	FY300/1
主轴类型 Spindle type		滚动轴承 Bearings	滚动轴承 Bearings
主轴直径mm Spindle diameter mm		Φ35	Φ50
外圆磨削主轴转速rpm Cylindrical Grinding Spindle rpm		2145	2228
内圆磨削主轴转速rpm Internal Grinding Spindle rpm		6265	6265
砂轮线速度m/s Wheel linear velocity m/s		35	35
内磨深度mm Internal Grinding Depth mm		220	270
电机功率kw Motor power kw		1.5/2.2	3
砂轮尺寸mm Wheel Size mm		Φ250 × 25(20-32) × Φ75	Φ300 × 40(25-40) × Φ75
内圆砂轮尺寸mm Inner Wheel Size mm		Φ80 × 20 × Φ20	Φ80 × 20 × Φ20
重量Kg Weight Kg		65	95
外型尺寸 mm Size mm 长 × 宽 × 高 Lenght*wide*height		404 × 425 × 485	511 × 475 × 560

随机附件：砂轮，砂轮平衡轴，卸砂轮拔头。

Accessories: wheel, wheel balance shaft, wheel unloading pulling head.

选购附件：砂轮平衡架，手持式砂轮平衡仪，砂轮修整器。

Optional accessories: wheel balancing stand, wheel balancing handheld instrument, dresser.

FYK 系列中高机

FYK SERIES CROWNING GRINDER ATTACHMENT

中凸Convex crown

中凹Concave crown

螺旋Threads

圓柱Cylinder

梯形Taper ends

特点

●磨削工件广泛

可磨削橡胶、聚氨酯PU胶、硅树脂胶、塑料、金属、非金属及其他多种纤维材料辊。

●操作简单

触摸屏输入磨削参数，操作简单，方便。

●磨削精度高

最小磨削中高0.01mm，最大中高8mm。

●多种磨削参数输入方式

有三种磨削参数输入方式，即车床参数输入方式，磨削时间输入方式，磨头纵向移动速度输入方式（如编码器）。

●多种曲线磨削

中高中凹曲线可为抛物线，圆周曲线，正弦曲线，两端锥面，中间为平面曲线。

●磨削曲线矫正

- 可矫正机床本身精度及因调整原因加工工件出现的缺陷。
- 可矫正中高磨削辊类工件出现的中高对称性缺陷。

Features

●Widely used

It can grind rubber, polyurethane PU glue, silicone rubber, plastics, metals, non-metallic materials and a variety of other fiber roll.

●Easy to operate

Touch screen operation -----replace the traditional buttons control panel.

●Precision grinding

The convex / concave crown height range is from 0.01 mm to 8.00 mm.

●Various modes of grinding parameters input

There are three modes of grinding parameters input, ie lathe parameter input , grinding time input and grinding longitudinal movement speed input mode (such as encoders).

●Multiple curve grinding

The convex / concave crown height can be parabolic curve, circular curve, sinusoidal curve and taper ends curve.

●Grinding curve correction

- To correct the grinding defects generated by the machine tool itself.
- To correct the symmetry of convex / concave crown height curve.

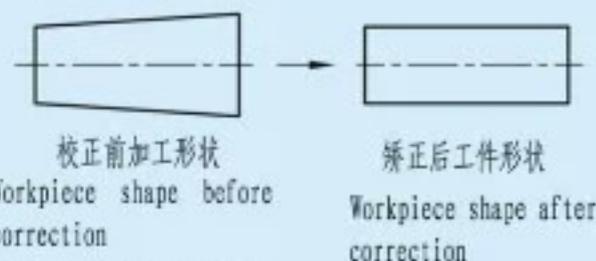

曲线校正

Curve Correction

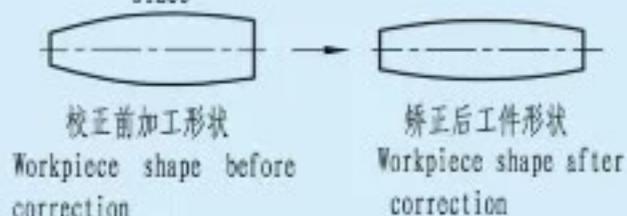

机床本身精度及调整问题造成工件加工形状

To correct the grinding defects
generated by the machine tool itself

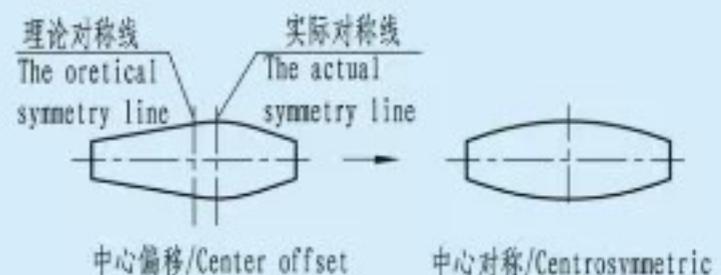

■ 工件带锥/Workpiece taper

■ 工件大小头/Ends of different sizes

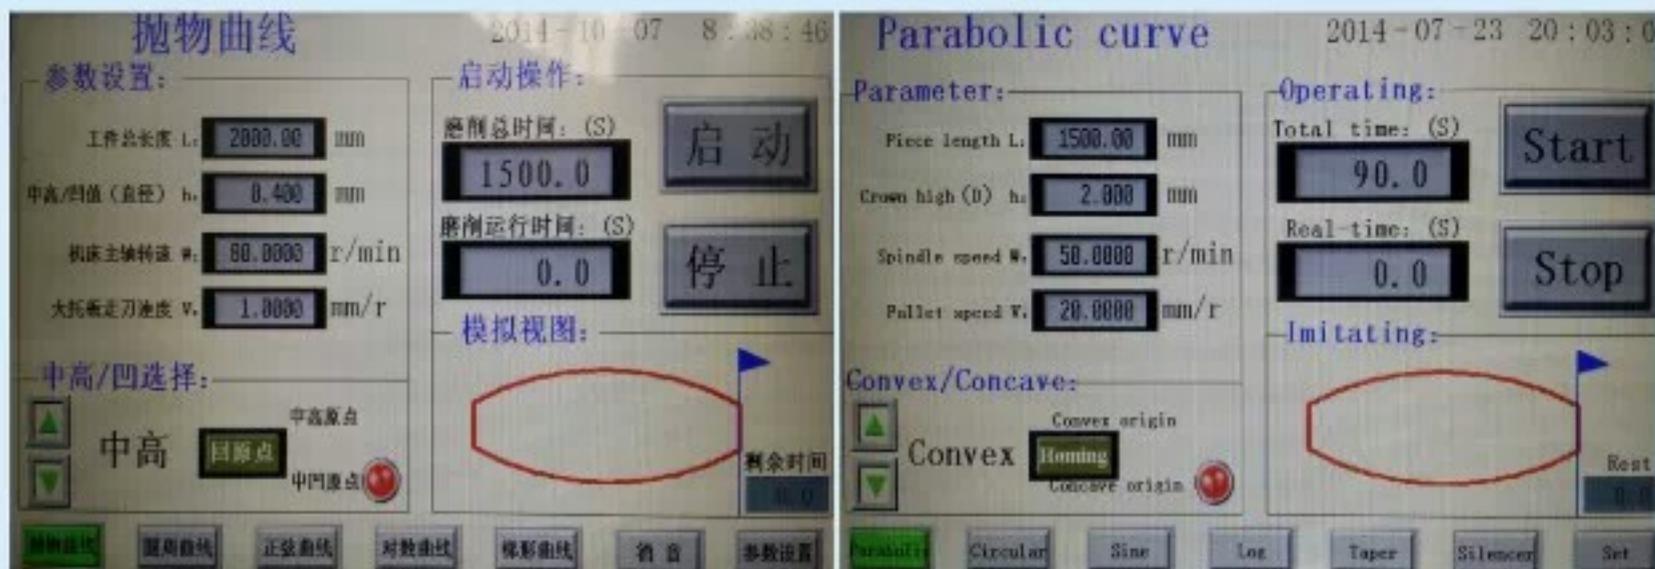

■ 中心偏移/Center offset
